The Trump Administration’s Deregulatory Progress And Forecast

DAN BOSCH, DAN GOLDBECK | MAY 21, 2018

THE TRUMP ADMINISTRATION'S DEREGULATORY *Progress & Forecast*

The **Spring 2018 Unified Agenda of Regulatory and Deregulatory Actions** shows the Trump Administration is making substantial deregulatory progress. With the release of this agenda, AAF turns its focus to rules that have been affected by **Executive Order (EO) 13,771**.

EO 13,771:

An order that requires executive agencies to **reduce** regulatory burden and meet cost savings targets.

WHAT'S IN THE *Unified Agenda?*

499 *Deregulatory actions*

+

133 *Regulatory actions**

**actions significant enough to be covered by EO 13,771*

3.75-*to*-1
DEREGULATORY-TO-REGULATORY RATIO

This exceeds the Trump Administration's goal of 2-to-1.

Annualized savings goal for executive agencies:
$686.6 *Million*

Executive agencies are on pace to **double the savings goal**, with savings of:
$1.4 *Billion*

The *Unified Agenda* is an illuminating document for discerning the administration's deregulatory priorities.

Its rulemaking record is coming more into focus, and that record appears to be one poised to roughly double its goals of a 2-for-1 deregulatory-to-regulatory ratio and $686.6 million in net savings.
