

## Week in Regulation

# \$27 Billion in Costs

SAM BATKINS | MAY 2, 2014

It was a record week for regulatory burdens, as the administration published more than \$27 billion in total costs. Annualized costs were \$2.8 billion, compared to \$14.1 billion in annualized benefits. This is the first time that benefits exceed costs for the year. This week's regulatory cost equates to a per person burden of \$88.16.

AAF has catalogued regulations according to their codification in the Code of Federal Regulations (CFR). The CFR is organized into 50 titles, with each title corresponding to an industry or part of government. This snapshot will help to determine which sectors of the economy receive the highest number of regulatory actions.

On Monday, EPA published its Tier 3 fuel emissions standards, which cut the sulfur content in gasoline from 30 parts per million to 10 parts per million. AAF reviewed the final [rule here](#). EPA notes that the regulation will increase gasoline prices by roughly one cent and raise the price of a vehicle by \$80. The annualized benefits of Tier 3 are \$12.3 billion, compared to \$1.5 billion in costs.

The Department of Energy (DOE) published the second costliest regulation this week, a proposal to increase efficiency standards for fluorescent lamps. The total cost of the measure is \$12.8 billion. DOE has now finalized three economically significant efficiency standards this year and proposed four more. In addition, the White House is currently reviewing five “economically significant” pending standards. The agency could easily take the crown for costliest regulator in 2014.

## AFFORDABLE CARE ACT

There were no notable health care rulemakings this week. Since passage, based on total lifetime costs of the regulations, the Affordable Care Act has imposed an estimated cost of [\\$27.5 billion](#) in private-sector burdens, approximately \$8 billion in costs to the states, and 159.1 million annual paperwork hours.

## DODD-FRANK

There were three Dodd-Frank rulemakings this week. Combined, they added \$220 million in total costs and more than 37,000 hours. One final rule, Regulatory Capital Rules, would not impose direct compliance costs, but increased capital standards would result in foregone tax benefits. For this measure, supervised institutions would lose roughly \$200 million in tax benefits from switching capital.

Based on calculations from the [Financial Services Roundtable](#), Dodd-Frank regulations would require 30,211 employees to file federal paperwork.

## A NOTE ON NOTICES

There were 504 notices published this week. Regulators proposed 25 new paperwork requirements, imposing 4.1 million paperwork burden hours. One of these notices monetized the cost of completing paperwork, adding \$1,850 to the overall compliance burden.

There were three major changes to existing paperwork requirements (defined as an hourly burden increase or

decrease of 500,000 or greater). These changes accounted for a net total decrease of 65.6 million burden hours.

## TOTAL BURDENS

Since January 1, the federal government has published \$57 billion in compliance costs and has imposed more than 10.9 million paperwork burden hours on net. [Click here](#) for our comprehensive database of regulations and rulemakings promulgated in 2014.
