State-by-State Estimates of Individual Mandate Payments

CONOR RYAN | OCTOBER 22, 2014

Using data on household income and health insurance coverage maintained by the Census Bureau and McKinsey estimates on previously uninsured households enrolled through the Health Insurance Marketplace, the American Action Forum was able to construct state-level estimates of individual mandate payments. After accounting for exemptions, AAF estimates that 5.2 million people will be subject to the individual mandate penalty for being uninsured in 2014 and will pay a total of \$5.8 billion in additional taxes. The AAF estimates include the exemptions for unauthorized immigrants, households that do not file income taxes, households that earn less than 138 percent of the federal poverty level, and households that cannot purchase a Bronze plan with 8 percent of household income, but do not attempt to project how many households may apply for one of the many hardship exemptions.
